FEMA Region 6 Weather Threat Briefing

Thursday, June 6, 2019

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

Summary of the Upcoming Week

SR ROC
REGIONAL OPERATIONS CENTER

Today

- **Severe thunderstorms (hail and damaging winds) likely across SE TX.**
- **Heavy rain/flash flooding continues across AR, E OK and E LA.**

Friday – Saturday

- **Heavy rain/flash flooding threat continues across E AR and E LA on Friday.**
- **Severe thunderstorms (hail and damaging winds) possible across SE TX and S LA on Friday**

Sunday – Monday

- **No significant weather impacts.**

Major River Flooding or Known Evacuations

- **The Arkansas River is cresting in major flood at Pine Bluff today.**
- **The Mississippi River is slowly rising and will crest next week.**
- **Seeing some quick rises in SE TX and S LA rivers with the recent heavy rainfall.**

Tropical Weather Outlook

- **No Tropical Activity is expected over the next 5 days.**

FEMA Region 6 Threat Matrix

June 5, 2019 – Jun 9, 2019

SR ROC
REGIONAL OPERATIONS CENTER

DAY / THREAT	THU	FRI	SAT	SUN	MON
Severe Storms	SETX	S LA/SETX			
Heavy Rain / Flash Flooding	E OK/AR/E LA	E LA/E AR			
Fire Weather					
Tropical Weather					
River Flooding	AR	AR	AR	AR	AR
	LA,/TX	LA/TX	LA/TX	LA/TX	LA/TX
	OK	OK	OK	OK	OK

	No Weather Threats Expected
	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

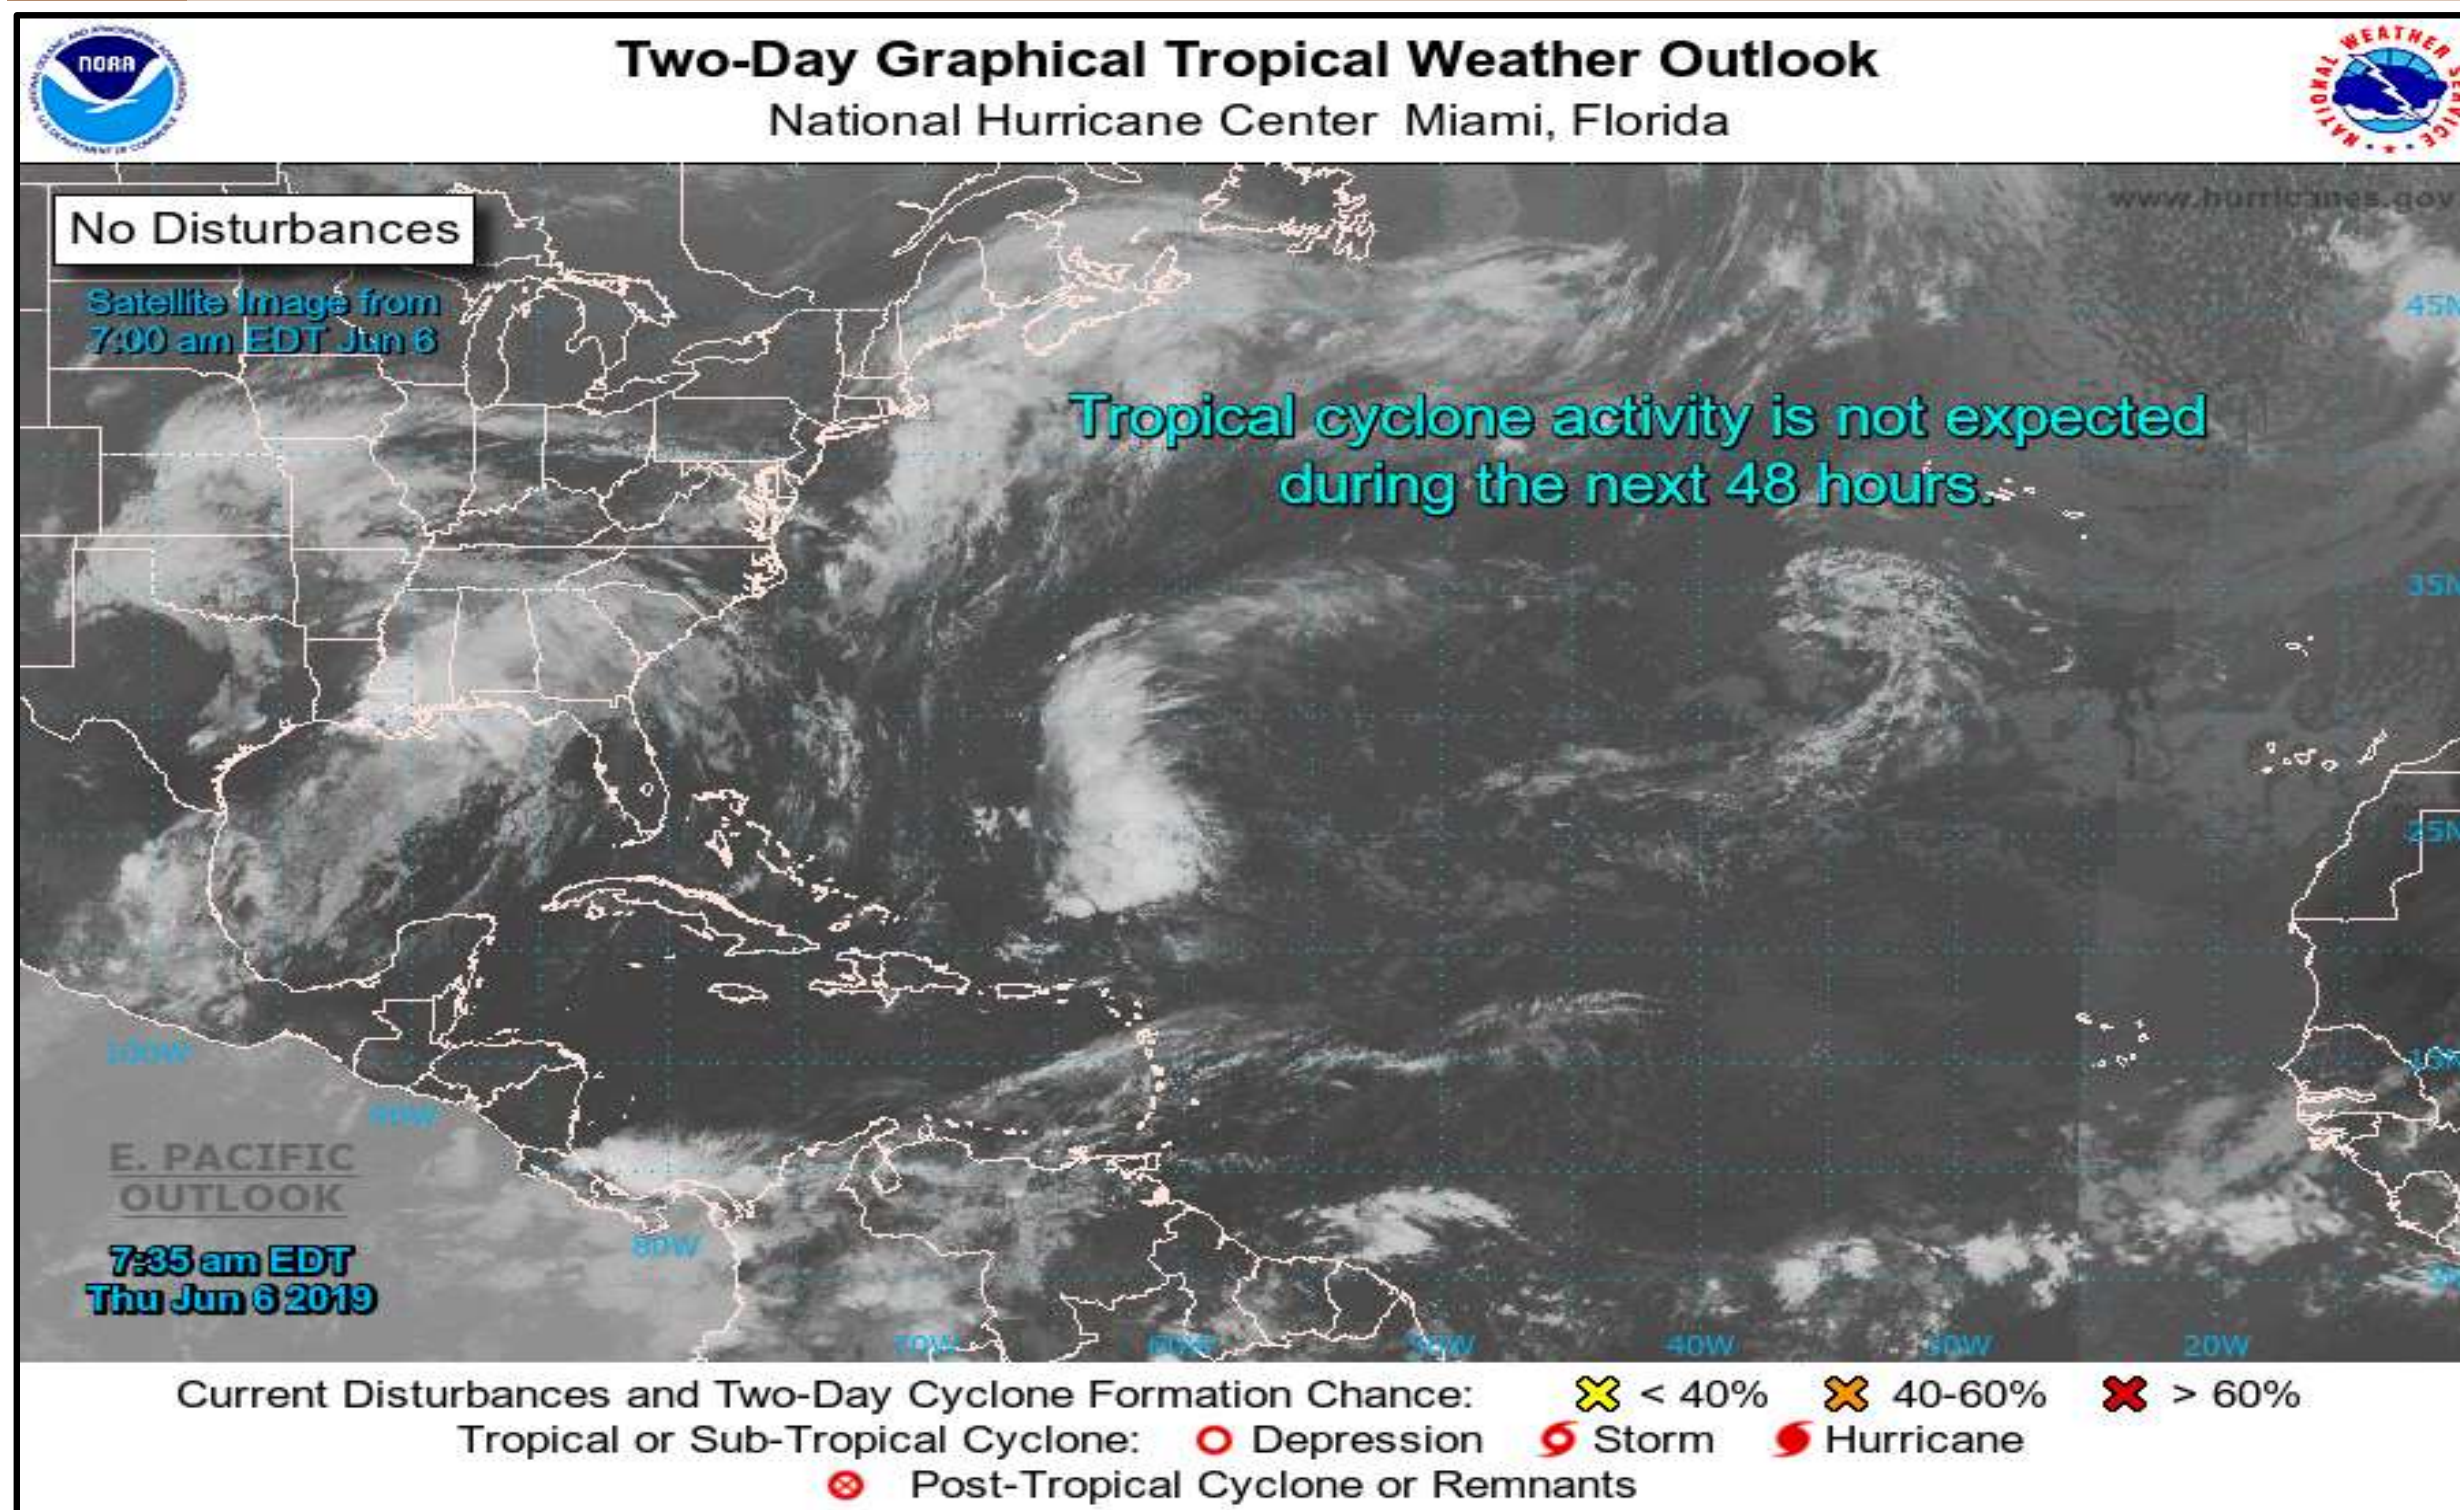

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

For more details on the colors in the threat matrix refer to the last slide in this briefing.

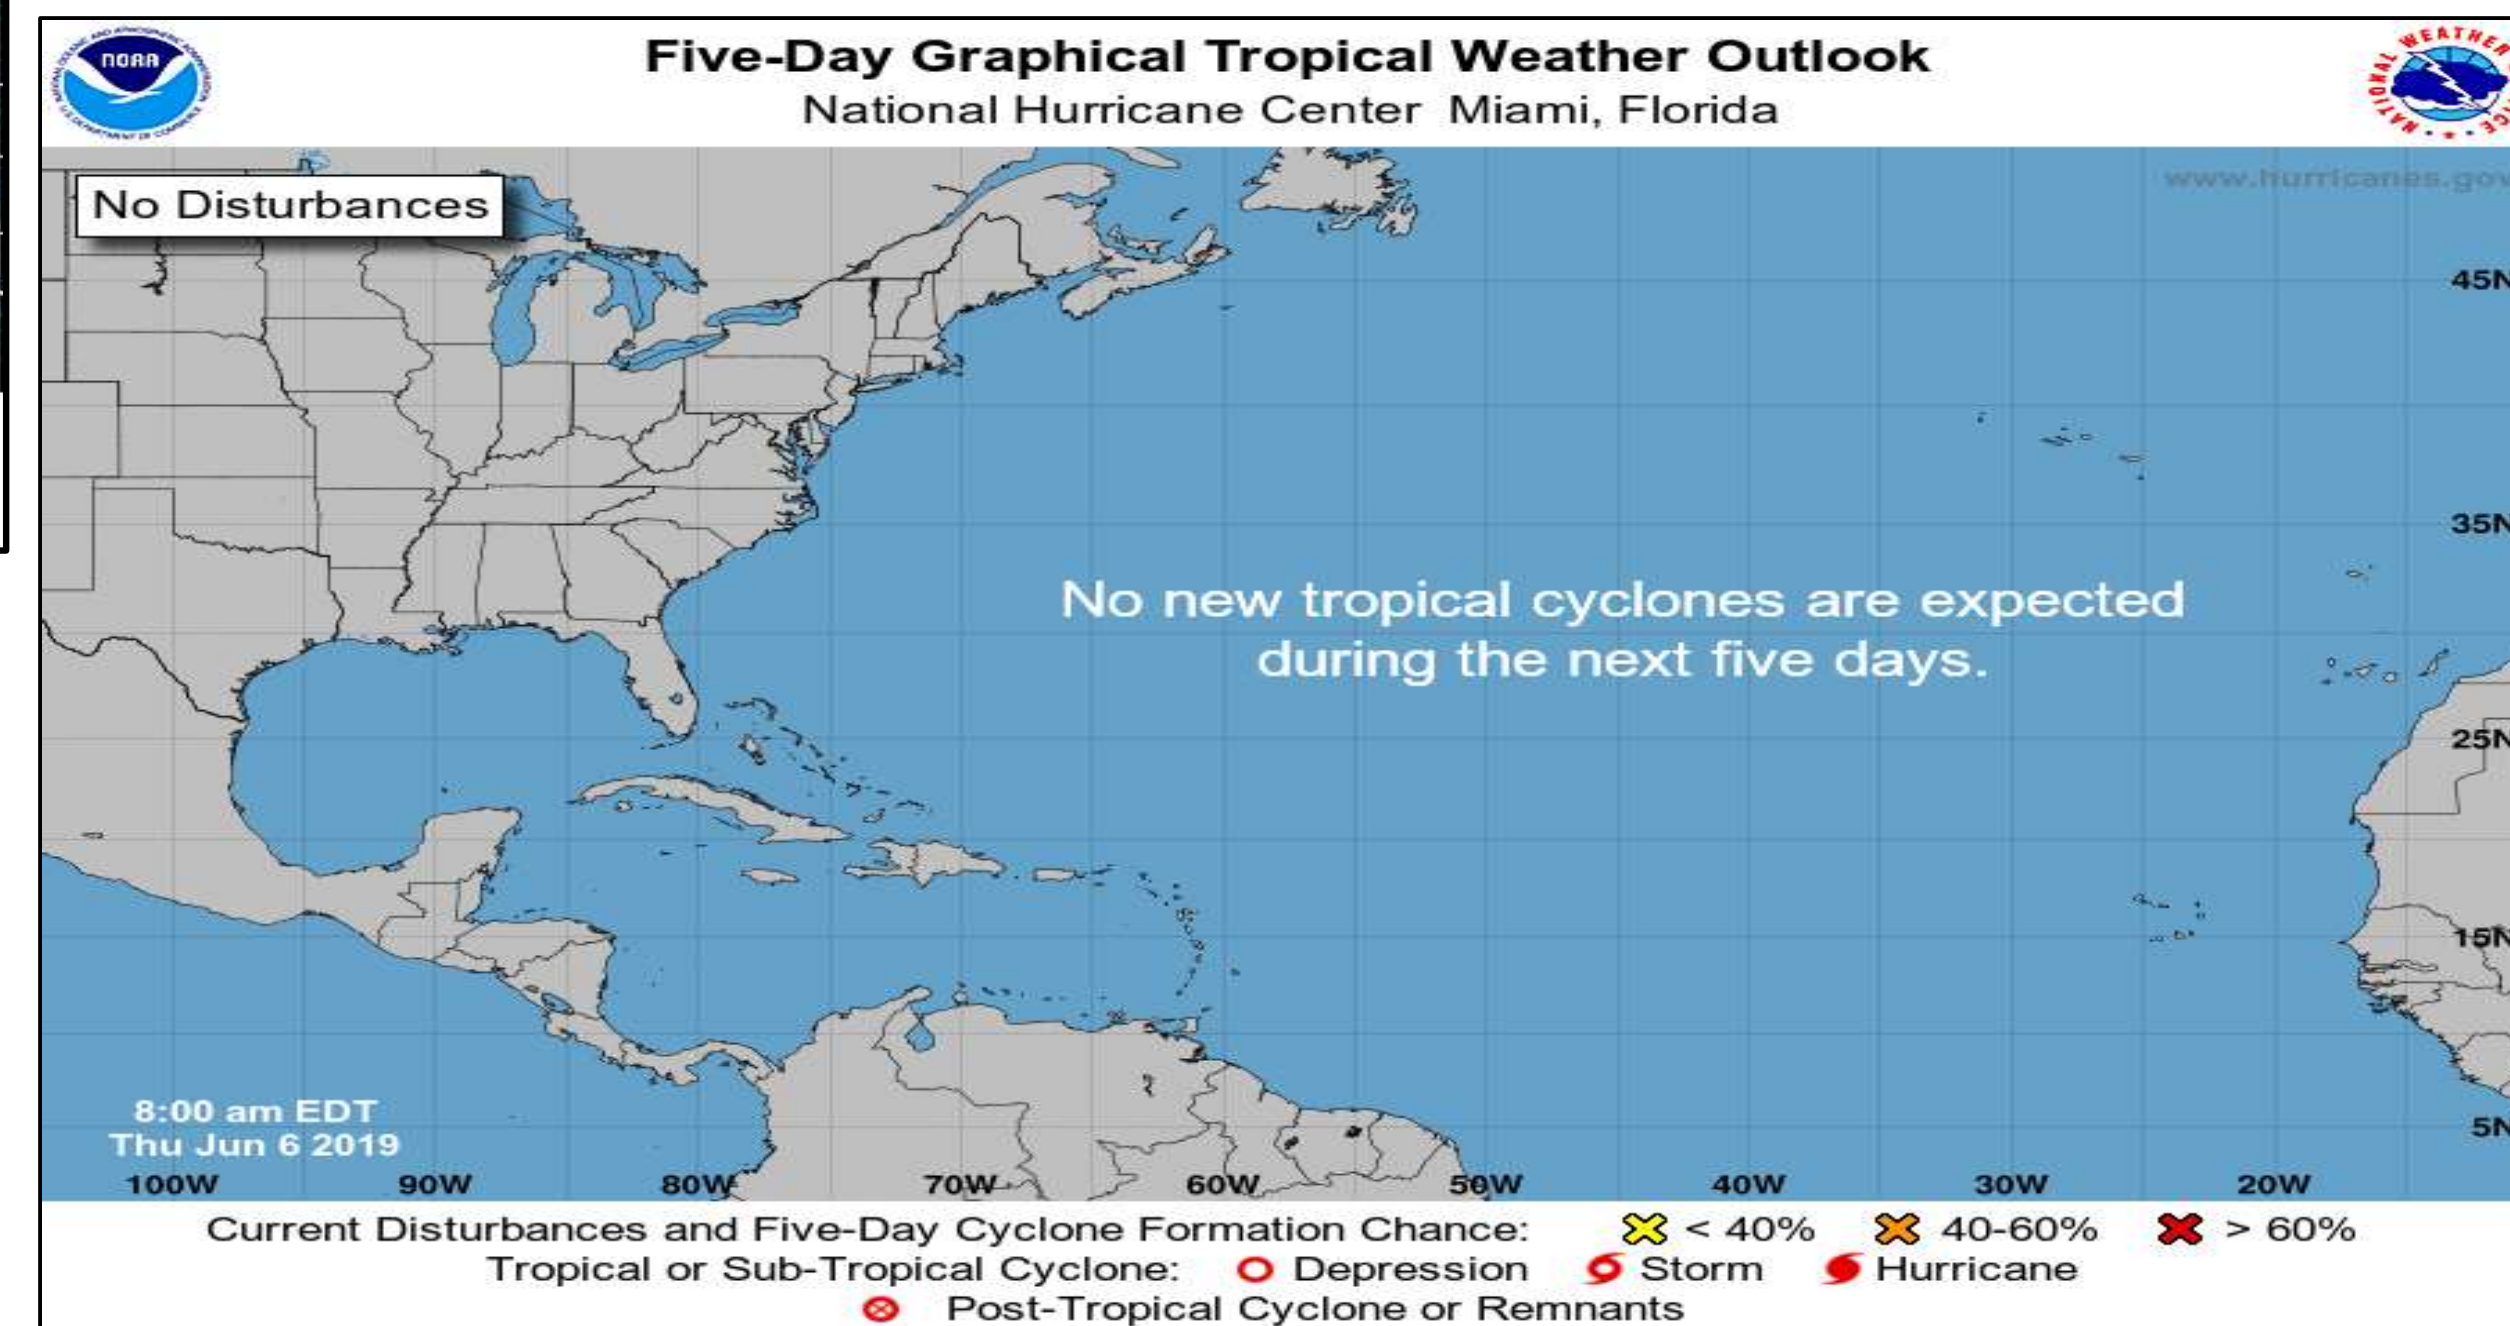

Tropical Weather Outlook – Atlantic/Gulf

SR ROC
REGIONAL OPERATIONS CENTER

No Tropical activity expected.

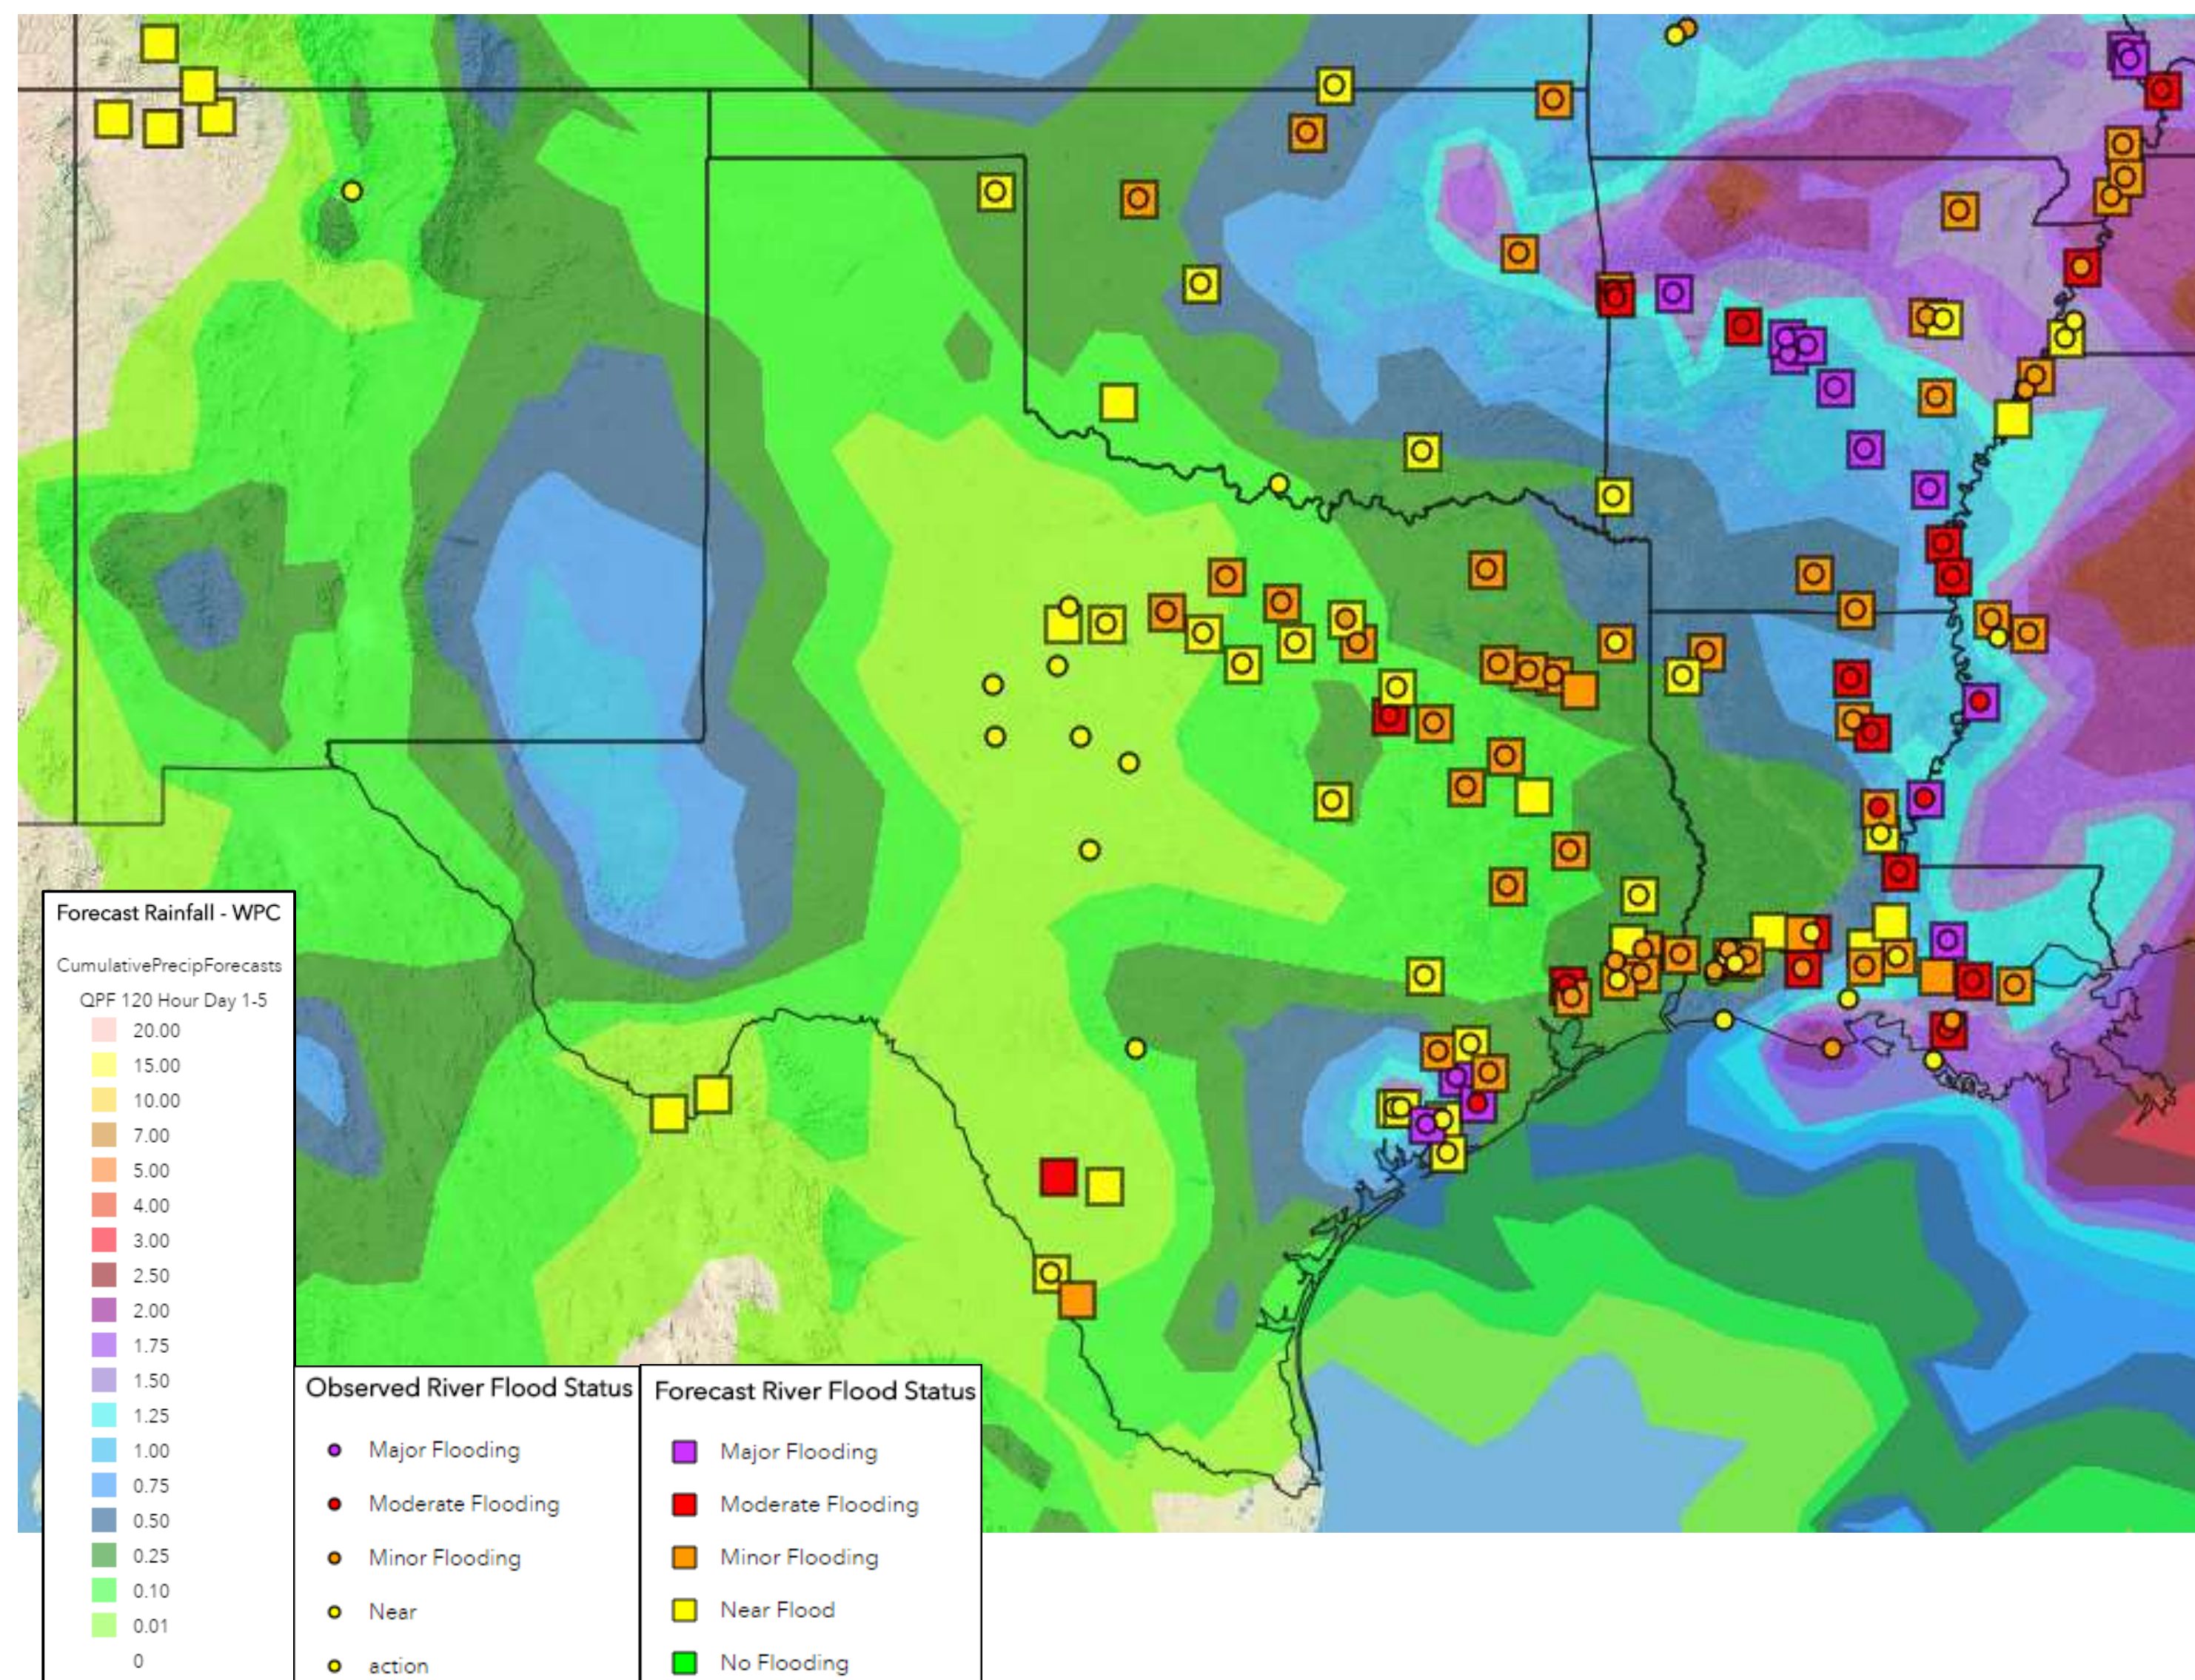

5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Rare, record flooding of the Arkansas River continues.

- The river is cresting at Little Rock today, see next slide for details on other points along the River in AR.
- Rain later this week (depicted in the 5-day rainfall forecast to the left) will slightly prolong the ongoing flooding, but is not expected to create additional crests on the AR River.

The Mississippi River will continue a slow rise into next week.

- Near Arkansas City, a crest in moderate flood is expected early next week with mostly roads impacted.
- The USACE has delayed the potential opening of the Morganza Floodway until Sunday.
- The Atchafalaya River at Morgan City, LA is forecast to crest in the third week of June and the current forecast is the 3rd highest crest on record and the highest since May 2011.
- Some smaller rivers and tributaries in SE TX and S LA are in major to moderate flood stage with the recent heavy rainfall; however only very minor rises are expected on the Arkansas and Mississippi Rivers

Arkansas River Flooding

Weather Forecast Office

Little Rock, AR

Issued June 6, 2019 6:30 AM CDT

Location	Latest Stage	Flood Stage	Projected Crest	Crest Date	Flood Category (Current)
Van Buren	28.5 ft @ 06 AM	22.0 ft	FALLING!	Crested R	Moderate
Ozark	365.8 ft @ 06 AM	357.0 ft	FALLING!	Crested	Major
Dardanelle	38.7 ft @ 05 AM	32.0 ft	FALLING!	Crested R	Moderate
Morrilton	41.0 ft @ 06 AM	30.0 ft	FALLING!	Crested R	Major
Toad Suck	284.3 ft @ 04 AM R	275.0 ft	FALLING!	Crested R	Major
Little Rock	29.4 ft @ 05 AM	23.0 ft	FALLING!	Crested	Major
Pine Bluff	50.7 ft @ 06 AM	42.0 ft	51.2 ft	June 7th	Major
Pendleton	36.9 ft @ 06 AM R	31.0 ft	38 ft R	June 9th	Major

R = Record Crest

Water levels along the Arkansas River will remain high or continue to rise this week.

Be prepared and keep up with the latest river stages and forecasts!

Weather “Threat” Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms

Criteria for the color codes in this briefing is to the left, please provide any feedback to
